PROFESSIONAL SUMMARY

Software professional with 6+ years of overall experience and 4+ years specialized as a Data Engineer. Expert in SQL, Azure Cloud, and ETL methodologies. Proven track record in designing scalable data pipelines, orchestrating complex data replication, and optimizing reporting solutions using SSIS and Tableau. Strong background in application logic (.NET) to automate workflows and enhance system reliability. Dedicated to driving data-driven insights through robust architecture and CI/CD implementation.

TECHNICAL SKILLS

- **Cloud & DevOps:** Azure Fabric, Azure Data Factory (ADF), Azure DevOps, CI/CD (YAML), Git, Bitbucket.
- **Data Integration:** SSIS (SQL Server Integration Services), Qlik Replicate, Qlik Compose, ETL Pipeline Design.
- **Databases:** Microsoft SQL Server, PL/SQL, T-SQL, Data Modeling, Warehouse Design.
- **Business Intelligence:** Tableau, Data Reporting, Dashboarding.
- **Programming:** Python, SQL, C#/.NET (Past Development).
- **Methodologies:** Agile, Scrum, Kanban, SDLC.

PROFESSIONAL EXPERIENCE

Wolters Kluwer ELM Solutions, Chennai

Oct 2022 – Present

Data Engineer

- **Data Pipeline Architecture:** Engineered and maintained enterprise-grade data reporting solutions using SQL Server and SSIS, ensuring 99.9% data availability for business intelligence teams.
- **Replication Management:** Orchestrated complex data replication and extraction workflows using Qlik Replicate and Qlik Compose, streamlining data availability across heterogeneous systems.
- **Performance Tuning:** Monitored and optimized execution plans, scheduled jobs, and T-SQL queries, significantly reducing latency and maximizing system throughput.
- **Business Intelligence:** Spearheaded the development of critical Tableau dashboards, improving reporting accuracy and enabling stakeholders to derive actionable business insights.
- **DevOps & CI/CD:** Implemented and supported YAML-based Azure DevOps pipelines for staging and production deployments, ensuring stable releases and minimizing downtime.

Tata Consultancy Services, Hyderabad

May 2019 – Oct 2022

System Engineer

- **Backend Development:** Developed and maintained backend application logic using C#/.NET, focusing on system stability and workflow automation for enterprise clients.

- **Performance Engineering:** Enhanced system response times and navigation efficiency through Sitecore optimization, resulting in improved user experience.
- **Security Compliance:** Identified and remediated security vulnerabilities (such as XSS) by implementing rigorous sanitization protocols (DOM Purify), ensuring adherence to global data security standards.
- **Quality Assurance:** Conducted comprehensive manual testing to validate performance metrics and security compliance prior to production deployment.

PROJECTS

Object Detection with Voice Assistance

- Developed an AI-powered real-time object recognition system using Python (YOLO algorithm) and the COCO dataset, accurately identifying 80+ distinct object types.
- Integrated text-to-speech libraries (eSpeak, gTTS) to convert visual data into auditory feedback, enhancing accessibility for visually impaired users.

Audio Guide for Doctor Prescription System

- Developed a data-driven utility to digitize prescription text data into QR codes, enabling instant retrieval via a secure web platform.

EDUCATION

VR Siddhartha Engineering College

2019

B.Tech, Computer Science & Engineering (CSE)

- CGPA: 8.45/10

CERTIFICATIONS

- Microsoft Certified: Azure Fundamentals
- University of Michigan (Coursera): Python Data Structures
- Cisco Certified: Introduction to Cybersecurity
- Cisco Certified: Programming Essentials in C

ACHIEVEMENTS

- **Competitions:** Semi-Finalist in Tech Gig Code Gladiators 2021; Won 3rd Prize in Engineers' Day Competition across the CSE department (2018).
- **Participation:** Participated in the Cybersecurity Research Teaser Internship at IIIT Hyderabad (April-May 2021).
- **Academics:** Ranked in Top 5% for Data Structures & Algorithms Using Python (NPTEL).
